

GALILEO C 1000 – ULTIMATE ROUGH SOLUTION

MOGI Microscope Optical
Gem Inclusion
VS - VVS1

PLANOX Advanced Rough
Software

OGIREX X-Ray Automatic
Inclusion Mapping

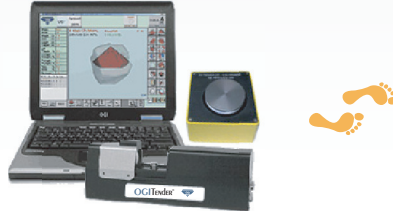

\$12163

GALILEO KEY FEATURES:

- Analyzes and detects inclusions in all kinds of stones, from deep frosted to crystal.
- Detects any visible inclusion, from VVS1 to I3 and Gleatz.
- Advanced software automatically calculates the position of the inclusion and the clarity grade as viewed by the Galileo system.
- Best Value function plans and suggests the most accurate and profitable planning options based on different shapes, cut grades, colors, inclusions, clarity grades and locations.
- OGI Terminals and Planox software enable you to optimize your profit while increasing your diamond production.
